TERMS OF REFERENCES for CEAS TECHNICAL COMMITTEES

- The **Vehicle Design** Technical Committee has the mandate of [promoting](#) the [research, development](#), and application related to **Vehicle Design** while striving for excellence, and enhanced communication between all parties involved in this field.
- The field of interest of the Committee envelops all aspects of **Vehicle Design** covering the complete range and all associated technologies and tools, not excluding related subjects such as facilities and instrumentation for the design, development of aeronautical products.
- To carry out its mandate, the **Vehicle Design** TC will establish [thematic working groups](#), organize [workshops](#) and actively support the organization of symposia and conferences. It will also support and promote [publications](#) in relevant scientific and technical journals, prepare position papers, etc.
- In addition, the Committee will maintain an active [link with European Universities](#) in order to promote the awareness of (TC typical) related subjects among future professionals and to facilitate the [contacts between industry and academia](#) in this field. Considerations will be made of possible regulation evolution.
- Furthermore, the Committee is encouraged to [cooperate with Technical Committees of other international professional associations](#), within and outside Europe, when MOU's have been signed with them.
