

5th CEAS Air & Space Conference – CEAS 2015

7-11 September 2015, Delft University, The Netherlands

List of Papers with links to the landing pages, which include the link to the document (PDF)

<u>21st Century Skills for the Aerospace Industry Workforce and Their Translation to the Classroom</u>	Lappas, Ilias (South Wales University), Kourousis, K.I.K. (University of Limerick)
<u>A distributed simulation framework for rapid deployment of research demonstrators</u>	Entz, Ricardo (Airbus Defence and Space), Tressoldi Moreira, Fernandes de Oliveira, Schubert, Dickmanns, Stenzel, Scherer, Schwening (Airbus Defence and Space GmbH)
<u>A Flight State Estimator That Couples Stereo-Vision, INS, and GNSS Pseudo-Ranges to Navigate with Three or Less Satellites</u>	Andert, Franz; Dittrich, Jörg; Batzdorfer, Simon; Becker, Martin; Bestmann, Ulf; Hecker, Peter
<u>A Frequency-Limited H2 Model Approximation Method with Application to a Medium-Scale Flexible Aircraft</u>	Vuillemin, Pierre; Poussot-Vassal, Charles; Alazard, Daniel
<u>A Full-Authority Automatic Flight Control System for the Civil Airborne Utility Platform S15 – LAPAZ</u>	Dalldorff, Lothar; Luckner, Robert; Reichel, Reingard
<u>A High-Precision Position Turn-Table as the Reference for Angular Accelerometer Calibration Experiment</u>	Jatiningrum, Dyah (Delft University of Technology), Lu, P., De Visser, C.C., van Paassen, M.M., Mulder, M. (Delft University of Technology)

<u>A Low-Cost Integrated System for Indoor and Outdoor Navigation of Miniature UAVs</u>	Marmet, François-Xavier; Bertrand, Sylvain; Hérissé, Bruno; Carton, Mathieu
<u>A methodological approach for the Product Development Process optimization of aircraft components</u>	Mulder, Bram (Delft University of Technology), La Rocca, G. (Delft University of Technology), De Jong, H., Van der Elst, S. (KE-works)
<u>A Multidisciplinary and Practical view in Aeronautical Engineering Education</u>	De Paula, Adson (Technological Institute of Aeronautics ITA), Germano, J.S.E., Morales, M.A., Carvalho, F.C., Passador, F.E (Technological Institute of Aeronautics ITA)
<u>A Multiple-Observer Scheme for Fault Detection, Isolation and Recovery of Satellite Thrusters</u>	Abauzit, Antoine; Marzat, Julien
<u>A New Approach for the Validation of Potential Pilot Gain Measures</u>	Niewind, Ina
<u>A New Joint Sensor Based Backstepping Control Approach for Fault-Tolerant Flight Control</u>	Sun, Liguu; Chu, Qiping; de Visser, Cornelis. C.
<u>A New Substitution Based Recursive B-Splines Method for Aerodynamic Model Identification</u>	Sun, Liguu; Chu, Qiping; de Visser, Cornelis. C.
<u>A semi-empirical methodology for balanced field length estimation of jet-engined aircraft in early design phases</u>	Angeiras, Tulio (Embraer), Orra, T.H. (Embraer), Paula, A.A., Mattos, B.S. (Instituto Tecnológico de Aeronáutica - ITA)
<u>A Spherical Coordinate Parametrization for an In-Orbit Bearings-Only Navigation Filter</u>	Grzymisch, Jonathan; Fichter, Walter; Casasco, Massimo; Damiana, Losa
<u>Accelerating MRO procedures for composite materials using innovative detection techniques</u>	Schoemaker, Christiaan (Hogeschool van Amsterdam), Pelt, M.M.J.M., Boer, R.J., Borst, M.S. (Hogeschool van Amsterdam), Groves, R.M. (Delft University of Technology)
<u>Active and Passive Disturbance Isolation for High Accuracy Control Systems</u>	Boquet, Fabrice; Falcoz, Alexandre; Bennani, Samir

<u>Active Flow Control Applied at the Engine-Wing Junction</u>	Fricke, Sebastian (previously German Aerospace Center DLR), Vlad Ciobaca, Anna Kröhnert, Jochen Wild (DLR), Olivier Blesbois (Airbus Operations)
<u>Adaptive Augmentation of a Fighter Aircraft Autopilot Using a Nonlinear Reference Model</u>	Leitão, Miguel; Peter, Florian; Holzapfel, Florian
<u>Adaptive Control of Flutter Suppression of Wind Turbine Blade Using Microtabs</u>	Li, Nailu; Balas, Mark; Nikoueeyan, Pourya
<u>Adaptive Disturbance Tracking Control to Maximize the Power Capture of Large Wind Turbines in below Rated Wind Speed Region</u>	Thapa Magar, Kaman; Balas, Mark; Frost, Susan
<u>Adaptive Trajectory Controller for Generic Fixed-Wing Unmanned Aircraft</u>	Mühlegg, Maximilian; Dauer, Johann; Dittrich, Jörg; Holzapfel, Florian
<u>Aerial Delivery dynamic model validation by Flight Test</u>	Oliver, Mercedes (Airbus Defence and Space), Pérez, A.P., Rodríguez, A.J. (ALTRAN), Climent, H.C. (Airbus Defence and Space)
<u>Aerodynamic modelling of an active flow control system for flapless flight control in the preliminary design stages</u>	Stadlberger, Korbinian (Technische Universität München), Hornung, M. (Technische Universität München)
<u>Aerodynamic Validation of a Parametric Airfoil Description</u>	Melin, Tomas (Linköpings Universitet), Gårdhagen, R. (Linköpings Universitet)
<u>Aeroelastic Concepts in Civil Aircraft Wings Design</u>	Mazidi, Abbas (Yazd university), Fazalzadeh, S.A., Ranjbar, A. (Shiraz university)
<u>Aeroservoelastic Investigations of a High-Aspect-Ratio Motor Glider</u>	Silvestre, Flavio Jose
<u>Air Data Sensor Fault Detection Using Kinematic Relations</u>	Van Eykeren, Laurens; Chu, Qiping
<u>Air Traffic Flow Optimisation With Trajectory Uncertainty</u>	Bil, Cees (RMIT University), Assaad, Z., Eberhard, A., Moore, M. (RMIT University)

<u>Aircraft Longitudinal Guidance Based on a Spatial Reference</u>	Bouadi, Hakim; Choukroun, Daniel; Mora-Camino, F.
<u>Aircraft Preliminary Design: the Windowless Concept</u>	Bagassi, Sara (University of Bologna), Lucchi, F., Persiani, F. (University of Bologna)
<u>All moving tail plate interaction on an aerodynamic characteristic of the rocket plane in tailless configuration</u>	Kwiek, Agnieszka (Warsaw University of Technology), Figat, M.F., Senenko, K.S. (Warsaw University of Technology)
<u>An ecological flow-based decision support tool for future 4D-trajectory management by air traffic control</u>	Klomp, Rolf (Delft University of Technology)
<u>An Impulsive Input Approach to Short Time Convergent Control for Linear Systems</u>	Weiss, Martin; Shtessel, Yuri B.
<u>An optional APU for passenger aircraft</u>	Scholz, Dieter (Hamburg University of Applied Sciences)
<u>Analysis Of Aircraft Configurations Including Propagated Uncertainties</u>	Pfeiffer, Till (German Aerospace Center DLR), Moerland, E., Böhnke, D. (German Aerospace Center DLR)
<u>Analysis of the flow in a propulsion nozzle subjected to a fluid injection</u>	Chellou, Nassir (Hassiba Benbouali University of Chlef), Benarous, A, Guendez, M. (Hassiba Benbouali University of Chlef)
<u>ANDROID Small Active Debris Removal Mission</u>	Escorial Olmos, Diego (GMV Aerospace and Defence SAU), Peters, T.V.P. (GMV Aerospace and Defence SAU), Naudet, J. (QinetiQ Space), Chitu, C.C. (GMV Romania), Sewerin, J.K., Barcinski, T. (Centrum Badani Kosmicznych Polskiej Akademii Nauk)
<u>Application of Frequency-Limited Adaptive Quadrocopter Control</u>	Scheper, Kirk Y. W.; Magree, Daniel; Yucelen, Tansel; De La Torre, Gerardo; Johnson, Eric N.
<u>Assessment of aircraft noise sources variability using an acoustic camera</u>	Merino Martinez, Roberto (Delft University of Technology), Snellen, M.S., Simons, D.G. (Delft University of Technology TUD)
<u>Auralization of novel aircraft configurations</u>	Arntzen, Michael (National Aerospace Laboratory NLR), Bertsch, L. (DLR), Simons, D.G. (Delft Technical University)

<u>Automatic Control Generation for Aircraft Taxi Systems through Nonlinear Dynamic Inversion of Object Oriented Model</u>	Re, Fabrizio
<u>Automatic Landing System of a Quadrotor UAV Using Visual Servoing</u>	Ho, Hann Woei; Chu, Qiping
<u>Automatic UAV Landing with Ground Target Maintained in the Field of View</u>	Burlion, Laurent; de Plinval, Henry
<u>Autonomous flying: a must for the future</u>	Graaff, Adriaan (AD Cuenta)
<u>Autonomous planning and replanning of a single Unmanned Aerial Vehicle: strategies and simulations</u>	Fusaro, Roberta (Politecnico di Torino), Boggero, L., Cresto Aleina, S., Viola, N. (Politecnico di Torino)
<u>Autonomous robotic system for active debris removal: requirements, state-of-the-art and concept architecture of the rendezvous and capture (RVC) control architecture/system</u>	Jankovic, Marko (German Research Center for Artificial Intelligence (DFKI GmbH) / University of Bremen), Kumar, K., (Dinamica Srl) Romero Martin, J., Vasile, M. (Strathclyde University), Ortiz Gómez, N., Walker, S.J.I. (Southampton University), Kirchner, F. (DFKI), Topputo, F. (Politecnico di Milano)
<u>Autonomous Wind Tunnel Free-Flight of a Flapping Wing MAV</u>	De Wagter, Christophe; Koopmans, Andries; de Croon, Guido; Remes, Bart; Ruijsink, Rick
<u>Aviation – Environmental Threats Simplified methodology of NOx and CO emissions estimation</u>	Glowacki, Pawel (Institute of Aviation), Czyz, S., Kawalec, M.
<u>Carbon Dioxide Emissions from Air Traffic Internal to Industrialised States and between them</u>	Alain Garcia, Alain (Air and Space Academy), Rigaudias, Jean-Baptiste (retired Air France VP Environment)
<u>Characteristics of locked and free-wheeling ducted fan based on wind tunnel tests and CFD analyses</u>	Rodzewicz, Mirosław (Warsaw University of Technology), Bogdanski, Krzysztof. (Warsaw University of Technology)

<u>Citric acid aerospace stainless steel passivation: a green approach</u>	Bragaglia, Mario (University of Rome Tor Vergata""), Rinaldi, M. (University of Rome Tor Vergata""), Cacciotti, I. (University of Rome Niccolò Cusano""), Mori, S., Nanni, F., Montesperelli, G. (University of Rome Tor Vergata"")
<u>Clean Sky Technology Evaluator – Air Transport System assessments</u>	Junior, Alf (German Aerospace Center DLR)
<u>Clean Sky Technology Evaluator – Noise assessment and experience at airport level</u>	Eenige, Michel (National Aerospace Laboratory NLR)
<u>CleanSat: the Clean Space’s response to the space debris situation</u>	Soares (European Space Agency)
<u>Clusterization of airport cities and cluster dynamics for an air passenger demand network topology forecast based on socio-economic development scenario</u>	Terekhov, Ivan (German Aerospace Center DLR), Gollnick, V G (DLR, Air Transportation Systems)
<u>Combined Launch System: a new concept to reduce the launch costs for Micro (Cube) Satellites and Debris hunting probes</u>	Ahmed, Hamed (Cairo University)
<u>Comparative study of European RPAS regulations</u>	Cuerno-Rejado, Cristina (Technical University of Madrid), Sanchez-Carmona, A. (Universidad Politécnica de Madrid)
<u>Comparison of Nonlinear Dynamic Inversion and Backstepping Controls with Application to a Quadrotor</u>	Wang, Jian; Holzapfel, Florian; Peter, Florian
<u>Comparison of the Potential Environmental Impact Improvements of Future Aircraft Concepts Using Life Cycle Assessment</u>	Johanning, Andreas (Hamburg University of Applied Sciences), Scholz, D. (Hamburg University of Applied Sciences)
<u>CompoWorld: an innovative approach to innovation and economic development</u>	Veldman, Bouke (Stichting CompoWorld)

<u>Computation of Thermodynamic Cycle for Novel Detonation Aircraft Engine</u>	Cuciumita, Cleopatra (Romanian Research and Development Institute for Gas Turbines COMOTI), Porumbel, I. (COMOTI Romanian Research and Development Institute for Gas Turbines)
<u>Conception of Sub-Optimal Solution for Spacecraft Rendezvous Near an Elliptic Orbit</u>	Felisiak, Piotr; Sibilski, Krzysztof
<u>Concurrent Learning Adaptive Model Predictive Control</u>	Chowdhary, Girish; Mühlegg, Maximilian; How, Jonathan P.; Holzappel, Florian
<u>Constrained Adaptive Control with Transient and Steady-State Performance Guarantees</u>	Schatz, Simon Philipp; Yucelen, Tansel; Johnson, Eric N.
<u>Contributing to Orbital Sustainability with an Independent Decommissioning Device for Satellite and Launcher Space Implementing Space Debris Mitigation Measures</u>	Antonetti, Stefano (D-ORBIT), Ferrario, L.F., Rossetti, LR (D-ORBIT SRL)
<u>Cooling channel flow characterization using Particle Image Velocimetry and Laser Induced Fluorescence</u>	Rochlitz, Henrik (TU Braunschweig), Scholz, P.S. (TU Braunschweig)
<u>Cooperative Autonomous Collision Avoidance System for Unmanned Aerial Vehicle</u>	Jenie, Yazdi Ibrahim; van Kampen, Erik-Jan; Remes, Bart
<u>Damage identification in composite panels using acousto-ultrasonic waves</u>	Loendersloot, Richard (University of Twente)
<u>Decentralized Energy Management for Spacecraft Attitude Determination</u>	Amini, Rouzbeh; Gill, Eberhard; Lisowski, Jakub
<u>Decision-making inconsistencies in ATC: an empirical investigation into reasons for rejecting decision support automation</u>	Westin, Carl (Delft University of Technology), Borst, C. (Delft Technical University), Hilburn, (Center for Human Performance Research)

<u>Decoupling the Eye: A Key Toward a Robust Hovering for Sighted Aerial Robots</u>	Manecy, Augustin; Juston, Raphaël; Marchand, Nicolas; Viollet, Stephane
<u>Design and analysis of the control and stability of a Blended Wing Body aircraft</u>	Merino Martinez, Roberto (Polytechnic University of Madrid UPM)
<u>Design and Flight Testing of Nonlinear Autoflight Control Laws Incorporating Direct Lift Control</u>	Lombaerts, Thomas; Looye, Gertjan
<u>Design of a Waypoint Tracking Control Algorithm for Parachute-Payload Systems</u>	Gursoy, Gonenc; Prach, Anna; Yavrucuk, Ilkay
<u>Design of UAV for photogrammetric mission in Antarctic area</u>	Goetzendorf-Grabowski, Tomasz (Warsaw University of Technology), Rodzewicz, M.R. (Warsaw University of Technology)
<u>Design, implementation and evaluation of a system to support Well Clear</u>	Theunissen, Erik (Netherlands Defence Academy), Suarez, B (General Atomics Aeronautical Systems Inc.)
<u>Detection of Abnormal Aircraft Control Surface Position Using a Robust Parametric Test</u>	Gheorghe, Anca; Zolghadri, Ali; Cieslak, Jérôme; Henry, David; Goupil, Philippe; Dayre, Remy; Le-berre, Hervé
<u>Developing a standardised methodology for space-specific Life Cycle Assessment</u>	Austin, Julian (European Space Agency), Jakob Huesing (Rhea for European Space Agency), Tiago Soares (European Space Agency), LuisaInnocenti (European Space Agency)
<u>Developing Generic Flight Schedules for Airport Clusters</u>	Bießlich, Peter (Hamburg University of Technology), Gollnick, V.G. (Hamburg University of Technology)
<u>Development of laser beam welding concepts for fuselage panels</u>	Kashaev, Nikolai (Helmholtz-Zentrum Geesthacht), Riekehr, S., Falck, R., Enz, J. (Helmholtz-Zentrum Geesthacht), Robson, J., Tian, Y. (The University of Manchester, School of Materials), Karanika, A. (Hellenic Aerospace Industry S.A., Research and Product Design)
<u>Dynamic Measurements on the NASA CRM Model tested in ETW</u>	Hensch, Ann-Katrin (European Transonic Windtunnel ETW), Quix, H. (ETW)

<u>Dynamic Trajectory Control of Gliders</u>	Dilao, Rui; Fonseca, Joao
<u>Eco-Space Project - Environmental Impact of new technologies</u>	Saint-Amand, Maud (Airbus Defence and Space), Ouziel, J.O. (Airbus Defence & Space)
<u>Ecodesign for space and aerospace: what happens when we make ecodesign relevant for demanding applications?</u>	Pettersen, Johan Berg (Asplan Viak), Bergsdal, H. (Asplan Viak), Bjørnbet, M.M. (Sintef Raufoss Manufacturing), Silva, E.J. (ISQ), Ringen, G. (Sintef Raufoss Manufacturing), Estrela, M.A. (ISQ)
<u>Environmental prospects in aviation: a study from the Air & Space Academy FC</u>	Joselzon, Alain (Air and Space Academy)
<u>ESA's e.deorbit mission and its roadmap to Active Debris Removal</u>	Biesbroek, Robin (European Space Agency)
<u>Estimation of Nonlinear Parameters from Simulated Data of an Aircraft</u>	Dhayalan, R
<u>ESWIRP: European Strategic Wind tunnels Improved Research Potential – Program Overview</u>	Boyet, Guy (ONERA)
<u>European Personal Aero-Transportation. Using of the Double-Flutter Flight Principle for Manufacturing of Personal Flying-Cars by European Aircraft and Car Manufacturers</u>	Sandu, Constantin (Romanian Research and Development Institute for Gas Turbines COMOTI), Brasoveanu, D. (Orbital ATK), Voicu, R., Deaconu, M., Cican, G., Zavodnic, F. (COMOTI)
<u>Experiences with the Barracuda UAV Auto Flight System</u>	van Tooren, Joost; Hammon, Reiner
<u>Experimental investigations based on a demonstrator unit to analyse the combustion process of a nitrous oxide/ethene premixed green bipropellant</u>	Werling, Lukas (German Aerospace Center DLR), Perakis, N., Hochheimer, B.I.J., Gernoth, A., Schleichriem, S. (German Aerospace Center DLR)
<u>Fault Tolerant Control of Octorotor Using Sliding Mode Control Allocation</u>	Alwi, Halim; Edwards, Christopher

<u>Fault-Tolerant Spacecraft Magnetic Attitude Control</u>	Sadon, Aviran; Choukroun, Daniel
<u>FEM analyses of joined wing aircraft configuration</u>	Mieloszyk, Jacek (Warsaw University of Technology), MSc Kalinowski, M. (Warsaw University of Technology)
<u>Flight Control Algorithms for a Vertical Launch Air Defense Missile</u>	Tekin, Raziye
<u>Flight Envelope Protection for Automatic and Augmented Manual Control</u>	Lambregts, Antonius, Adrianus
<u>Flight Guidance and Control of a Tethered Airplane in an AirborneWind Energy Application</u>	Sieberling, Sören
<u>Flight Nutation Validation of the COS-B and EQUATOR-S Spacecraft</u>	Kuiper, Hans
<u>Flight Test Oriented Autopilot Design for Improved Aerodynamic Parameter Identification</u>	Krings, Matthias; Henning, Karsten; Thielecke, Frank
<u>Flight-physical aspects and methods of future military aircraft designs</u>	Hitzel, Stephan Maria (Airbus Defence and Space)
<u>Fuselage aerodynamic drag prediction method by cfd</u>	Della Vecchia, Pierluigi (University of Naples Federico II""), Nicolosi, F., Ciliberti, D., Cusati, V. (University of Naples)
<u>Future wing Hybrid Laminar Flow Control suction system design and analysis</u>	Alderman, James (Airbus Group Innovations)
<u>Generic TECS Based Autopilot for an Electric High Altitude Solar Powered Aircraft</u>	Kastner, Nir; Looye, Gertjan
<u>GN&C Engineering Lessons Learned from Human Space Flight Operations Experiences</u>	Dittemore, Gary; Dennehy, Neil

<u>GNC Aspects for Active Debris Removal</u>	Colmenarejo, Pablo; Binet, Giovanni; Strippoli, Luigi; Peters, Thomas V.; Graziano, Mariella
<u>GNC Challenges and Navigation Solutions for Active Debris Removal Mission</u>	Kervendal, Erwan; Chabot, Thomas; Kanani, Keyvan
<u>Green Solid Propellants for Launchers</u>	Wingborg, Niklas (Swedish Defence Research Agency, FOI)
<u>Ground Test Vibrations as non-conservative mean of compliance for vibration airworthiness requirements of A/C mechanical systems design</u>	Palomares, Angel (Airbus Defence and Space)
<u>Gyro Bias Estimation Using a Dual Instrument Configuration</u>	Ruizenaar, Marcel; van der Hall, Elwin; Weiss, Martin
<u>Hardware-In-The-Loop – an Essential Part of the Development Process for the Automatic Flight Control System of a Utility Aircraft</u>	Boche, Bernd; Kaden, Andre; Luckner, Robert
<u>Impacts of a Prognostics and Health Management System on Aircraft Fleet Operating Cost during Conceptual Design Phase by using Parametric Estimation</u>	Fioriti, Marco (Politecnico di Torino), Pavan, G. (Alenia Aermacchi), Corpino, S., Fusaro, R. (Politecnico di Torino)
<u>Implementation of GNSS-based RNAV-flight procedures – quantification of potential benefits for business aviation users</u>	Böck, Philipp (Intraplan Consult), Schubert, M. (Intraplan Consult GmbH)
<u>Improving the Performance of an Actuator Control Scheme During Saturation</u>	Lo, Chang How; Shin, Hyo-Sang; Tsourdos, Antonios; Kim, Seung-Hwan
<u>Incremental Backstepping for Robust Nonlinear Flight Control</u>	Acquatella B., Paul; Van Kampen, Erik-Jan; Chu, Qiping
<u>Integrated Modelling of an Unmanned High-Altitude Solar-</u>	Klößner, Andreas; Leitner, Martin; Schlabe, Daniel; Looye, Gertjan

<u>Powered Aircraft for Control Law Design Analysis</u>	
<u>Integrated multidisciplinary engineering solutions at Fokker Aerostructures</u>	Berg, Tobie (Fokker Aerostructures), Laan, A.H., Hootsmans, L.M. (Fokker Aerostructures)
<u>Integrating sustainability in the design of space activities: development of eco-design tools for space projects</u>	Chanoine, Augustin (Deloitte), Le Guern, Y., Witte, F. (Deloitte)
<u>Integration of Mission Trajectory Management functions into CleanSky Technology Evaluation Process</u>	Cadot-Burillet, Delphine (Airbus Operations), Albert, M.A. (Airbus Operations)
<u>Interactive 3D Visualization to Support Concurrent Engineering in the Early Space Mission Design Phase</u>	Deshmukh, Meenakshi (German Aerospace Center DLR), Wolff, R., Fischer, P.M., Flatken, M., Gerndt, A. (German Aerospace Center DLR)
<u>Introducing Air to Air Refuelling (AAR) into Civil Aviation</u>	Nangia, Raj (consultant)
<u>Introducing eco-design to ESA - An overview of the activities towards a coherent eco-design approach</u>	Huesing, Jakob (European Space Agency), Julian Austin, Tiago Soares (European Space Agency)
<u>Investigation of Manual Control Behaviour During Flight Control Mode Switching: Test Procedure and Preliminary Results</u>	Schönfeld, Andrej
<u>Jumbo City Flyer</u>	Gangoli Rao, Arvind (Delft University of Technology), Eitelberg, G (DNW- German-Dutch Wind Tunnels)
<u>L1 Adaptive Control for Systems with Matched Stochastic Disturbance</u>	Souanef, Toufik; Pinchetti, Federico; Fichter, Walter
<u>Landing Gear Conceptual Design and Structural Optimization of a Large Blended Wing Body Aircraft</u>	Cumnuantip, Sunpeth (German Aerospace Center DLR)

<u>Lateral Fly by Wire Control System Dedicated to Future Small Aircraft</u>	Heller, Matthias; Baier, Thaddäus; Schuck, Falko
<u>LFT Model Generation Via L1-Regularized Least Squares</u>	Pfifer, Harald; Hecker, Simon
<u>Linear Parameter Varying Control of an Agile Missile Model Based on the Induced L2-Norm Framework</u>	Tekin, Raziye; Pfifer, Harald
<u>Linear Quadratic Integrated vs. Separated Autopilot-Guidance Design</u>	Levy, Maital; Shima, Tal; Gutman, Shaul
<u>Longitudinal Control Law for Modern Long Range Civil Aircraft</u>	Delannoy, Stephane; Oudin, Simon
<u>Mach number control improvement in ONERA s1ma large sonic wind tunnel</u>	Crozier, Pascal (ONERA), Chargy, C., Pichon, R. (ONERA)
<u>Methodology for the Validation of Loads in Rational Turning Analysis</u>	Chorro Martínez, José Manuel (Airbus Defence and Space), Parra Adan, S., Martínez Pérez, A.D., Gómez Viñas, J.E., Juan Antonio, J.A. (Airbus Group), Tito Carrillo, J. (Sertec)
<u>Methods of flight-path planning for UAV photogrammetry missions with consideration of aircraft dynamic properties</u>	Glowacki, Dominik (Warsaw University of Technology), Hajduk ,J. (Air Force Institute of technology), Lis, M., Dziubinski, A., Kryzstofiak, G (Institute of Aviation)
<u>Model based system assessment and trajectory optimization on aircraft level</u>	Re, F. (DLR), Schlabe, D., Müller, R. (German Aerospace Center DLR)
<u>Model Formulation of Pursuit Problem with Two Pursuers and One Evader</u>	Patsko, Valery, S.; Le Menec, Stephane; Kumkov, Sergey
<u>Model Reference Adaptive Control of Mildly Non-Linear Systems with Time Varying Input Delays - Part I</u>	Nelson, James; Balas, Mark; Erwin, Richard
<u>Model Reference Adaptive Control of Mildly Non-Linear Systems with</u>	Nelson, James; Balas, Mark; Erwin, Richard

<u>Time Varying Input Delays - Part II</u>	
<u>Modelling of Nonlinearities and Parasitic Effects in the Electro-Mechanical Command Transmission Path for a Real-Time Flight Simulation Model</u>	Meyer-Brügel, Wolfram; Steckel, Florian; Luckner, Robert
<u>Modification of the Approaches to Flying Qualities and PIO Event Prediction</u>	Efremov, Alexander; Korovin, Alexander; Koshelenko, Alexander
<u>Morphed vertical tailplane assessment for certification requirements</u>	Castillo-Acero, Miguel Angel (Aernnova), Cuerno-Rejado, C., Gómez-Tierno, M.A. (Escuela Técnica Superior de Ingenieros Aeronáuticos, UPM)
<u>Multi-Lifting-Device UAV Autonomous Flight at Any Transition Percentage</u>	De Wagter, Christophe; Dokter, Dirk; de Croon, Guido; Remes, Bart
<u>Multidisciplinary design optimization of flight control system parameters in consideration of aeroelasticity</u>	Nussbächer, Daniel (Airbus Defence and Space), Hanel, M., Daoud, F. (Airbus Defence and Space), Hornung, M. (Technical University of Munich)
<u>New green polymer composites processed by Additive Manufacturing for “clean space” applications</u>	Rinaldi, Marianna (University of Rome Tor Vergata""), Cacciotti, I. (University of Rome Niccolò Cusano""), Pambaguian, L., Ghidini, T. (European Space Agency ESA-ESTEC), Canala, V., Massarelli, V. (Mecaer Aviation Group), Nanni, F. (University of Rome Tor Vergata"")
<u>Non-Cascaded Dynamic Inversion Design for Quadrotor Position Control with L1 Augmentation</u>	Wang, Jian; Holzapfel, Florian; Xargay, Enric; Hovakimyan, Naira
<u>Nonlinear Model Predictive Control Applied to Vision-Based Spacecraft Landing</u>	Izzo, Dario; de Croon, Guido
<u>Nonlinear Non-Cascaded Reference Model Architecture for Flight Control Design with Flight Path Angle Rate Command System</u>	Zhang, Fubiao; Holzapfel, Florian; Heller, Matthias

<u>Nonlinear Output-Feedback H-Infinity Control for Spacecraft Attitude Control</u>	Capua, Alon; Berman, Nadav; Shapiro, Amir; Choukroun, Daniel
<u>Numerical and Experimental Investigations on Subsonic Air Intakes with Serpentine Ducts for UAV Configurations</u>	Berens, Thomas (Airbus Defence and Space), Delot, A.L. (ONERA), Tormalm, M.M. (Swedish Defence Research Agency (FOI)), Ruiz-Calavera, L.P., Funes-Sebastian, D.E. (AIRBUS Defence and Space), Rein, M. (DLR), Sätterskog, M. (SAAB AB, Aeronautics)
<u>On the Crucial Role of the Estimation in Interception Endgames</u>	Shinar, Josef; Turetsky, Vladimir
<u>On the minimization of cruise drag due to pitch trim</u>	Campos, Luis (Instituto Superior Técnico), Marques, J.M.G.M. (Instituto Superior Técnico)
<u>On thermo-acoustic acoustic-vortical-entropy waves and flow stability</u>	Campos, Luis (Instituto Superior Técnico), Marta, A.C.M. (Instituto Superior Técnico)
<u>Online Estimation of Mean Orbital Elements with Control Inputs</u>	Zhong, Weichao; Gurfil, Pini
<u>Optimal Control Gain for Satellite Detumbling Using B-Dot Algorithm</u>	Juchnikowski, Grzegorz; Barcinski, Tomasz; Lisowski, Jakub
<u>Oscillatory Failure Case Detection for Aircraft Using Non-Homogeneous Differentiator in Noisy Environment</u>	Cieslak, Jérôme; Efimov, Denis; Zolghadri, Ali; Henry, David; Goupil, Philippe
<u>Overall view of the European Collaboration in Aeronautics Research within GARTEUR</u>	Consigny, Hervé (ONERA), Vasseur, O., Delot, A.L. (ONERA)
<u>Position Tracking of a Multicopter Using a Geometric Backstepping Control Law</u>	Falconí, Guillermo P.; Holzapfel, Florian
<u>Preliminary Design Rules for Electromechanical Actuation Systems – the Effects of Saturation and Compliances</u>	Fu, Jian (Institut Clément Ader, INSA), Hazyuk, I., Maré, J.C. (Institut Clément Ader, INSA)

<u>PROBA-3 Rendezvous Experiment Design and Development</u>	Bastante, Juan Carlos
<u>Progress in Inverted Joined Wing Scaled Demonstrator Programme</u>	Galinski, Cezary (Institute of Aviation), Hajduk, J.H. (Air Force Institute of Technology), Adam Sieradzki (Institute of Aviation), Rodzewicz, M.R. (Warsaw University of Technology)
<u>Propulsive performance of a C_3H_4/H_2O_2 rocket prototype for future green bipropellant thrusters</u>	Pasini, Angelo (Alta), Pace, G., Torre, L. (Alta S.p.A.)
<u>Pulcher-pulsed chemical rocket with green high performance propellants: second year project overview</u>	Pasini, Angelo (Alta), Torre, L., Pace, G., Pasini, A. (Alta S.p.A.)
<u>Relative Optical Navigation for a Lunar Lander Mission</u>	Verveld, Mark Johannes
<u>Robust Thruster Fault Diagnosis: Application to the Rendezvous Phase of the Mars Sample Return Mission</u>	Fonod, Robert; Henry, David; Charbonnel, Catherine; Bornschlegl, Eric
<u>Rotorcraft Noise and Emissions Reduction Process for CleanSky – The Measurement of Success</u>	D'Ippolito, Roberto (Noesis Solutions), Smith, C.S. (Agusta Westland), Pachidis, VP (Cranfield University), Stevens, J.S. (National Aerospace Laboratory NLR), Thevenot, L.T. (Airbus Helicopters)
<u>Rotorcraft System Identification: An Integrated Time-Frequency Domain Approach</u>	Bergamasco, Marco; Lovera, Marco
<u>Rotorcraft-Pilot Coupling Research in Europe: A Success Story in Collaboration</u>	Dieterich, Oliver (Airbus Helicopters Germany), Pavel, M.D. (Technical University of Delft)
<u>RPAS Systems Overview and Configuration Tool</u>	Gruber, Mario (Fach Hochschule Joanneum), Flühr, H.F., Kainrath, K.K., Jelinek-Nigitz, H.J. (FH Joanneum), Fortner, R.F., Ritzinger, M.R. (AAI – Austrian Aeronautics Industries Group)
<u>Similarities of Hedging and L1 Adaptive Control</u>	Bierling, Thomas; Höcht, Leonhard; Merkl, Christian; Holzapfel, Florian; Maier, Rudolf
<u>Simulation Driven Design and Additive Manufacturing. A new</u>	Cervantes Herrera, Alejandro (Altair Engineering)

<u>design process to unleash potential of Additive Manufacturing freedom</u>	
<u>Single vs Two-Loop Integrated Guidance Systems</u>	Gutman, Shaul; Rubinsky, Sergey; Shima, Tal; Levy, Mital
<u>Solution Space-Based Complexity Metric for ATC</u>	Mercado Velasco, Gustavo (Delft University of Technology), Borst, C. (Delft University of Technology)
<u>Space Capsule Using Energy of Gravitational Field for Flight Control</u>	Sandu, Constantin (Romanian Research and Development Institute for Gas Turbines COMOTI), Brasoveanu, D. (Raytheon)
<u>Space-Borne Geolocation with a Quasi-Planar Satellite Cluster</u>	Leiter, Noam; Gurfil, Pini
<u>Spacecraft Attitude Control Based on Magnetometers and Gyros</u>	Bergamasco, Marco; Lovera, Marco
<u>Spacecraft Fault Detection & Isolation System Design Using Decentralized Analytical Redundancy</u>	Indra, Saurabh; Travé-Massuyès, Louise
<u>Special Equipment Which Uses Concentrated Solar Light for Earth Protection Against Asteroids-Advanced Design and Technology</u>	Sandu, Constantin (Romanian Research and Development Institute for Gas Turbines COMOTI), Brasoveanu, D. (Orbital ATK), Anghel, O., Voicu, R., Zavodnic, R. (COMOTI)
<u>Statistical Time and Market Predictive Engineering Design (STAMPED) Techniques for Preliminary Aircraft Sizing</u>	Barrett, Ronald (The University of Kansas)
<u>Stereo Vision Based Obstacle Avoidance on Flapping Wing MAVs</u>	Tijmons, Sjoerd; de Croon, Guido; Remes, Bart; De Wagter, Christophe; Ruijsink, Rick; Van Kampen, Erik-Jan; Chu, Qiping
<u>TECS Generalized Airplane Control System – an Update</u>	Lambregts, Antonius, Adrianus
<u>TECS-Based Generic Autopilot Control Laws for Aircraft Mission Simulation</u>	Looye, Gertjan

<u>THCS Generalized Airplane Control System Design</u>	Lambregts, Antonius, Adrianus
<u>The constructal principle and character law, hyperbolic, of natural design, a new paradigm of aerospace systems</u>	Stanciu, Virgil (University Politehnica of Bucharest), Pavel, C. (University Politehnica of Bucharest)
<u>The Experiments with Obstacle Avoidance Controls Designed for Micro UAV</u>	Kownacki, Cezary
<u>The implications of aerospace requirements on the design-space of a permanent magnet starter/generator</u>	Brink, Emile (Aeronamic), Gerber, M. (Aeronamic), Geest, M. (Technische Universiteit Delft), Zeilstra, D. (Aeronamic), Boer, A. (NLR)
<u>The influence of the drag dynamic stall in the vawt starting efficiency</u>	Malael, Ion (Romanian Research and Development Institute for Gas Turbines COMOTI), Dragan, V., Gherman, B. (Romanian Research & Development Institute for Gas Turbines COMOTI)
<u>The Influence of the Taylor Series Remainder on an Incremental Non-Linear Dynamic Inversion Controller</u>	Hertog, A.L.
<u>The Total Energy Control Concept for a Motor Glider</u>	Lamp, Maxim; Luckner, Robert
<u>Thermal Properties of C919X EHAs Operating During Whole Flight Envelope</u>	Fu, Yongling (Beihang University), Han, X., Qi, X.Y. (Beihang University), Wang, L.J. (COMAC)
<u>Thermally Induced Vibration Analysis of Flexible Solar Wing</u>	Kong, Xianghong (Nanjing University of Aeronautics and Astronautics), Yang, J. (RMIT University), Wang, Z. J. (NUAA)
<u>Time-Efficient and Accurate Performance Prediction and Analysis Method for Planetary Flight Vehicles Design</u>	Jarzabek, Artur A. (Technical University of Madrid UPM), Moreno Lopez, A.I., González Hernández, M.A., Perales Perales, J.M. (Technical University of Madrid UPM)
<u>Toward an Autonomous Lunar Landing Based on Low-Speed Optic Flow Sensors</u>	Sabiron, Guillaume; Chavent, Paul; Burlion, Laurent; Kervendal, Erwan; Bornschlegl, Eric; Fabiani, Patrick; Raharijaona, Thibaut; Ruffier, Franck

<u>UAV Trajectory Generation Using Fuzzy Dynamic Programming</u>	Basmadji, Fatina Liliana; Gruszecki, Jan
<u>Understanding Fleet Impacts of Formation Flight</u>	Boling, Bryan (RAND), Stumpf, E., Liu, Y. (RWTH Aachen University)
<u>Use of simulator motion feedback for different classes of vehicle dynamics in manual control tasks</u>	Lu, Tao (Delft University of Technology), Pool, D.M., Damveld, H.J., van Paassen, M.M., Mulder, M. (Delft University of Technology)
<u>Video Navigation and GNC System Layout for a Rendezvous with a Noncooperative Tumbling Target</u>	Sommer, Josef; Ahrns, Ingo
<u>Vision Based Rendezvous GNC Techniques and Test Benches for Active Debris Removal</u>	Bastante, Juan Carlos; Penin, Luis F.
<u>Visual tracking of ground and air targets</u>	Gafurov, Salimzhan (Samara State Aerospace University), Zakharov, K. (Samara State Aerospace University)
<u>Wind tunnel high speed powered tests of the ERICA tilt rotor model in S1MA - NICETRIP Project</u>	Lebrun, Frederic (ONERA)
<u>Wind tunnel model support and wall interference corrections in DNW-HST- ensuring high data quality standards -</u>	Wubben, Frenk (German-Dutch Wind Tunnels DNW), Takara, E.K. (Embraer)
